

# RUSS 316A

## Russian Through STEM

Study Russian for your professional needs

Gain proficiency in academic style

Learn terms and expressions used in Chemistry, Physics, Math, and Astronomy

- For Russian heritage language speakers, as well as students who have completed 2nd year Russian or higher (classes will be conducted entirely in Russian)
- For students who have an interest in technical fields or the Humanities
- For current UW students, high school students, or students from other colleges

## Extend your Russian to the STEM fields!

A Russian periodic table of elements titled 'ПЕРИОДИЧЕСКАЯ СИСТЕМА ЭЛЕМЕНТОВ'. It features a portrait of Dmitri Mendeleev on the right side. The table is color-coded by groups and includes element symbols and names in Russian.
